# **HP Color LaserJet 2820/2830/2840 printers**

## **Printing-System Reports**

# Printing-System Reports

## Introduction

This Printing-System Reports (PSR) section contains registry information about the following installations:

- HP Color LaserJet 2820/2830/2840 printers, Microsoft® Windows® 98 SE, USB, Minimum installation.
- HP Color LaserJet 2820/2830/2840 printers, Windows XP, USB, Typical installation.
- HP Color LaserJet 2820/2830/2840 printers, Windows XP, USB, Typical uninstall.

## Registry information

The printing-system reports that appear in this section contain the registry changes that take place when the HP Color LaserJet product software is installed.

The registry is a database used by Windows operating systems to store configuration information. Windows uses the registry to store almost all configuration information for the operating system, as well as other programs and services.

The operating system makes registry changes during the installation of print drivers. Any additions or deletions to the registry are managed by the operating system and are beyond the control of Hewlett-Packard, so this printing-system report does not cover the specific changes that are made by the operating system during a print driver installation. A report can be generated by the development lab to identify any changes made by the operating system, and the standard escalation procedure should be used to acquire this report.

**Windows 98 SE, USB, Minimum installation**
